

Savvy

The Village Voice

Glee club

For the eco-minded gum lover in your life, Savvy recommends **GLEE GUM**, imbued with love and a sense of social responsibility by independent New England family-owned Verve Products. Glee, which is made with old-fashioned chicle harvested from sapodilla trees in Guatemala, contains no artificial preservatives, flavors, colors, or sweeteners and is available from area organic food stores in many toothsome flavors. Even more fun are Verve's adorable, educational DIY chewing gum, chocolate, and gummi candy kits—meant for the kids, but grown-ups dig them, too. —LD Beghtol
